Burrowes State School opens their new Resource Centre and Hall extension

Member for Rankin, The Hon Craig Emerson has officially opened the Burrowes State School BER Project.

Mr Emerson toured the new state of the art Resource Centre which will fast become the school's hub for learning and exploring new technologies.

Mr Emerson said, "Burrowes staff and students should be proud of their new buildings and offered some advice about taking advantage of the new programs and facilities offered throughout the school."

"With more than \$17.9 million spent on school improvements and literacy and numeracy programs throughout 4132 students really need to start stepping up and tell teachers if they are struggling. This money is for students who find school hard and for those who find it easy. No one gets left behind in our 21st Century Schools and no one is held back."

Burrowes State School spent \$3.2 million on extending their school hall to include a full stage, dressing rooms for theatre productions, bathroom facilities, a fully equipped multimedia resource centre and library.

Students of Burrowes State School enjoy their new facilities
